Team,

I want to express what a wonderful job you did on delivering the assessment for Fidelity.

The deliverable quality was simply exceptional and what our clients deserve and expect from PwC. From the thought provoking content down to even the pixel alignment, everything was polished and perfect.

Warren, while I know you did not participate in the delivery due to independence matters, the FS Trends document was spot on to what was needed. This should be a core element to our billing 2.0 pov paper.

Proud of you guys and proud to be associated with you!

Mitch.
